Page 5

Noah's Ark Children and Youth Ministry (NACYM) is an indigenous not for profit organization registered with the NGO Bureau under the NGO Registration act 113, File number. MIA/NB/2003/07/4833. We focus on a holistic approach to child development and care, women, hard to reach people with a keen interest on the youth. NACYM runs a Childcare program, Education, Health, Agriculture and a Youth engagement program.

MISSION

VALUES

VISION

To promote a Biblical and holistic approach to Child development and care in the family.

- Biblical
- Child centered
- Family focused
- Integrity
- Responsibility
- Accountability
- Dedication
- Practical/
action oriented
- Adaptability
- Exemplary.

Every Child a family.

Word from the founder

2025 was an amazing year!

I saw the hand of God at work in a very powerful way through the support we received after our celebration of 25 years in 2024 as an organization. God had told me to build 2 schools and many more extension classrooms. The provisions kept coming from sponsors and well-wishers. Performance wise, we saw a growing number of people that needed our help which pity enough shows us that we are not done despite having been in service for the last 25 years. As an organization, we wish that we work ourselves out of the job, yet circumstances show that we are still needed! God

is challenging us to make use of what we have got by giving more children, youth and women a chance to survive.

This leaves us with a huge responsibility for 2026.

It demands us to step up our ingenuity to think outside the box because the numbers of our beneficiaries are increasing.

We are nearing completion of the extra classrooms in all our schools; the next challenge automatically comes up. Do we have sponsors for the children that need that help? Could there be organizations that would like to come on board to sponsor a child/children?

As God answered amazingly in 2025, I believe he will as well in 2026.

Together in his service.

Rev. Piet Buitendijk
Founder,
Noah's Ark Children and Youth Ministry.

Noah's Ark builds an ark!!

Above, our youth constructing the ark.

Where did you pick this inspiration?

We have built a building in the shape/model of an ark. It is easier to tell a story and get people listen if they see pictures. What is going on now in the world can be compared to the days of Noah with communities lost, commodity prices going up, young people looking for jobs, poverty margins widening, countries fighting each other!

How do I then preach? Lots of people in the times of Noah didn't make it because they didn't listen to the warnings.

The ark is a symbol of our Ministry.

Our desire is for people to ask questions then you can give them your story.

Then people are bound to listen which becomes more practical for me to share why we are called Noah's ark Children and youth Ministry.

Our work is to give hope.

Sir. Piet Buitendijk

HEADLINES FROM THE YEAR 2025

THE AFTER MATH OF THE 25 YEARS CELEBRATION WE ARE BUILDING THE FUTURE

In 2024 we celebrated 25 years of serving God and Uganda where the first lady Maama Janet Katah Museveni was the main celebrant. In appreciation for what the Organization has done in the lives of the vulnerable children and youth, many partners and stake holders came on board. Our team geared up to start another chapter with a lot of vigor.

Several of our partners out of Uganda and local producers in the construction materials production like Tororo cement, Bavima steel, modern tiles, Varsani group etc. came on board to support the many construction needs we presented.

The light house

The special needs children under our care due to their physical and mental disabilities, they require extra time, care and space which the children's home couldn't provide. By providing them with their own space, this would create a spacious and well-designed house to suit their needs. We believe that their lives don't need to be filled with darkness, that is why we came up with the name **light house**.

Above, some of our special needs children in wheel chairs behind. The ones on the floor are some of the babies under our care and the ones in blue aprons are some of the caretakers.

Above, the special needs house /light house .

MORE CONSTRUCTION WORKS.

Education and setting up of schools remain one of our core programs even in the next 25 years. This remains so because the Education gap among the under privileged communities remains a big challenge. Very few schools offer quality education and families still struggle to cover the associated costs like school fees as well as the basic requirements. Our mitigation plan was to start a second stream for our Mukono primary school and a 4-class room block in our Kalagala community school in Kayunga district so that we could give opportunity to more vulnerable children.

By end of year 2025, we had already roofed both blocks.

Above, the new primary school building block in Mukono.

Above, the new Kalagala community primary school block in Kalagala - Kayunga District.

Above, the new restaurant which will double as a training area for our catering students.

Above, the new stored office building which will house most of the departmental offices and the International office .

STARTING THE WEEK WITH PRAYER

At the beginning of year 2025, the founder (Papa) Piet Buitendijk centralized the Monday morning prayer meeting from a small group that had representatives of departments to every department praying at the same time or assembling together in one place.

The goal of this is to dedicate the week's activities to God and creating unity in our community.

*'A family that prays together stays together',
proverbs 22:6*

Above, a visitor praying for the children during a prayer meeting on a Monday.

VISION CASTING - THE GOOD SHEPARD

As a foundational responsibility of the founders, Papa has continued to play a vital role in shaping the Organization's identity and direction.

Because of his effective communication and consistency, many of our staff, stake holders and partners are inspired. The team is always guided on strategy which has created a shared understanding and prevention of our mission from drifting.

The vision casting he does as well has helped in building trust, motivation and mobilization of more people to support the work that we do.

Above, the founder on a vision casting session to staff.

Above, the founder leading a prayer meeting on a Monday morning. In the background are some of the staff.

Above, the NACMU community gathered for prayer on a Monday prayer meeting.

NOAH'S Ark Children's Ministry unveils New Logo.

The keen observer may have noticed that one of the children in our logo has grown up and is now a youth. As our children grow up and our educational programs expand, we no longer minister to only children but to a growing number of youth as well. We felt this should be reflected in our name and logo and therefore we have changed our name to "Noah's Ark Children and Youth Ministry".

YOUTH SKILLING - Exposing our students to entrepreneurship.

Through our Education program (New Horizon Secondary Vocation School) as well as the Youth empowerment program, we have continued to encourage our young people to appreciate that they need to understand entrepreneurship to be able to market the skills we are passing to them.

As our school equips them with skills, entrepreneurship enables them to transform the skills we give them into sustainable livelihoods, self-employment and be able to come up with community initiatives.

Also being that most of our learners come from economically disadvantaged backgrounds where formal employment opportunities are limited. We hope that exposing them to entrepreneurship enables them to create their own income generating activities.

Beyond class room work, our students learn essential skills such as problem solving, financial literacy, communication etc. which we hope will help our students to adapt to the changing market demands.

On every school visitation day, our students prepare what to sell to their parents and guardians. Students are tasked with activities like marketing, customer care, accounting etc.

Above, our students with their teachers marketing the school on the street as a learning opportunity.

Above, students items displayed for parents to see/buy on the exhibition day.

Above, our catering students serving a buffet to the visitors on the exhibition day.

Above, our students making School sweaters in the textile design class.

THE COFFEE PROGRAM - Exposure in coffee tourism by our Youth!

The coffee program as one of our skilling arms is a potential bridge towards transforming our youth. This year, we were able to operationalize the coffee house whose purpose is to work as a training place where our youth expose fellow youth, coffee farmers and visitors on coffee growing and production process.

Here, our youth take you through the production process right from plantation, harvesting and processing.

The training given goes beyond observation. Our youth expose trainees through a hands-on experience of the many stages of coffee production (coffee tourism).

This exposure has increased youth participation and many coffee farmers in the surrounding communities have started appreciating their own coffee.

A farmer is quoted on one of the trainings,

“No body has ever taught us this in the many years of coffee growing”

As a country through coffee tourism, we hope to expose our Ugandan coffee to the outside world because we believe Uganda produces one of the best coffees.

Our desire is for our youth to get out of the nest when they are able to earn a living through such activities.

A visitor is quoted,

“Iam amazed at the professionalism the youth exhibit. This has a future”.

FAMOUS COFFEE QUOTES

“Coffee is a language itself”.

“Coffee is a liquid hug for your brain”.

Above, one of our youth showing the visitors what dried coffee beans look like.

Above, Veronica demonstrating how to roast coffee.

The youth in a training session

STORIES OF HOPE - The temporary placement program.

The children we receive in this program often arrive frightened and emotionally distressed. As an organization, we provide immediate child centered care that prioritizes safety, dignity and healing. Individual case management and legal protection is also offered to these children until we are able to resettle them to their families or guardians. Our trained care givers create nurturing environments for all ages of the children we receive in this program.

Camilla's story

Having gotten pregnant by a married man, Camilla's mother didn't know where to go after giving birth. She abandoned her new born baby with the umbilical cord on in a junction at Namuyenje village. A concerned citizen alerted Mukono police which called us to rescue the baby. Our social workers immediately started the tracing process. Luckily after 1 week, our team traced Camilla's mother and grandfather. We brought them to our facility for Psychosocial support. After 1 month, she was ready to move on with her child. We went back to sensitize the community where the mother was staying so that she is accepted back.

Above, Our missionary Doctor at the police station dressing Camilla before Handing her to us.

Our team sensitizing the community while Camilla's mother was feeding her child.

CAUSES OF ABANDONMENT WE DEAL WITH IN THIS PROGRAM?

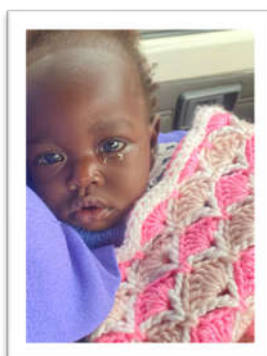

Social stigma and ignorance play a major role. Children born outside marriage, those with disabilities and those conceived through sexual violence are mostly rejected. Children are as well abandoned due cultural pressures and fear of shame. In some cases, young mothers abandon their children due to lack of family support.

Baby Selah

Selah 7 months was abandoned in a trench by her father because he couldn't afford to feed her.

A passerby alerted Mukono police station.

Immediately, Mukono police contacted us to rescue the baby. She was malnourished with a lot of flue and cough. Selah was immediately put on our malnutrition program. After a month of tracing, we were able to locate the mother and resettled her. Our health facility empowered Selah's mother on how to prepare simple nutritious meals for her child.

Above, sad selah on her way to Noah's Ark and right During the handover of selah to her young mother middle and grandmother right at the probation office.

Baby Simson

Simson was kidnapped by his mentally unstable mother from his Aunt that had offered kinship. Due to the condition of the mother, she later abandoned him on a veranda of an unknown person who informed police. Noah's ark was called to rescue Baby Simson.

Immediately our social workers together with police embarked on tracing. Luckily his father was traced and we handed baby Simson back to his father after 3 weeks.

Above, baby Simson on arrival and right a police officer together with our social worker handing Simson to his father.

STORIES OF HOPE - The Children's home

Under this program, we have continued to provide immediate safety and basic necessities to the abandoned children under our care. The children we receive in this program come as babies that are often exposed to neglect, abuse, hunger and homelessness. Our children's home offers a structured environment where children are fed, sheltered, clothed, given medical care, educated in the NACMU owned schools and free from any form of harm. For all the children we have received, this stability has been lifesaving.

To some parents as an act of disparity, abandoning children may seem as the only way of giving a child chance to survive.

Where it's possible, our social workers together with the police and probation offices have traced families as we continue to care for the children.

Because of you our sponsors and well-wishers, we have together changed many lives.

New entrants in the Children's Home

Baby Hans

A newly born baby weighing 1.98kgs wrapped in a blue baby showel was abandoned near a toilet with a plaster on his leg which had been written on his birthdate. Baby Hans was taken to Mukono police which latter called us for rescue.

Our team embarked on the special care we give all the babies under our care.

On failing to gain weight and constant fevers we ran several tests. Our Health facility was able to find treatment for his illness.

Hans feeds well and the fevers have gone.

Baby Hans before.

Baby Hans now.

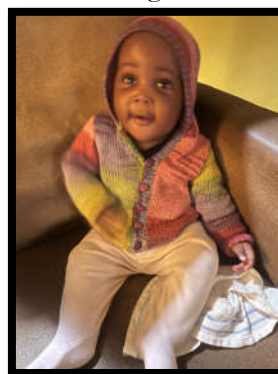

- 37 Children were abandoned.
- 25 Reunited with their families
- 185 Children are housed in the home currently.

Baby Darlene's story

On a Sunday afternoon, we received a call from Galilaaya police station requesting us to rescue baby Darlene who had been born at a road side by a mentally ill mother. A kind old woman took Darlene to Galilaaya Police station. Being that she was fragile, Police requested the old woman to temporary take her to a nearby health facility for emergency care as our team arrive.

As required by law, we informed the probation officer that she was going to be in our custody.

Darlene is now 5 months and thriving.

Above, Mama with baby Darlene at the police station before she brought her home. And right, Baby Darlene now.

Baby Nico's story

Nico before.

Nico After

Nico was born to a mentally ill mother who would sleep in abandoned houses and eat on dustbins. When she was in labor, she was helped by a Village health team representative. Each time she would be encouraged to breast feed the baby, the mother would push fragile Nico away. The VHT representative took Nico to Katosi police station because he wasn't safe in the hands. Police called us to temporarily care for Nico. He is 7 months and thriving as our social workers continue to trace for his other family members.

NOAH'S ARK HEALTH PROGRAM

Despite the government's efforts to boost the health sector, many Ugandans are still experiencing lack of affordable health care.

Inpatient care costs on average about 20 usd a night which is not affordable for most people considering a monthly average income of about 78 usd.

The patient's financial status is the biggest determinant of the care you can receive.

In most facilities, If a patient is unable to pay a consultation fee, you are deemed unfit to pay for your medical bill.

Noah's Ark Health center iii as an alternative health care provider for over 15 years has operated on the fundamental principles of humanity and still committed to improving the wellbeing of the vulnerable children and communities.

Our intervention has not only promoted health care access but as well accountability to our stake holders like Ministry of health, donors and the communities we serve.

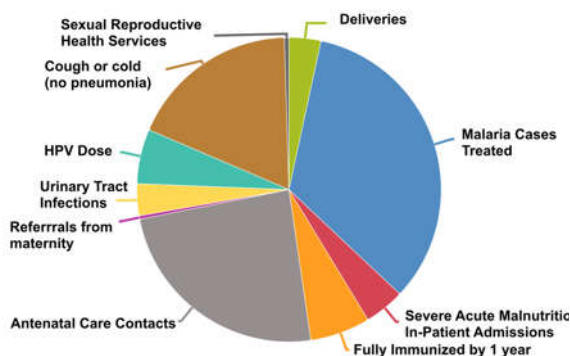

We have played a commendable role in ensuring that the right to good health becomes a reality to the beneficiaries of our programs.

In 2026, we hope to start an in and outpatient program in our Health facility in Kayunga District-Kalagala village.

Through our Health program, we have managed to achieve the milestones below.

Below, a chart showing our clinic intervention and right, our intervention in numbers.

Noah's Ark Health Centre III (2025)

Above, our health facility team in Mukono.

Above, our Health facility official sensitizing patients on our Nutrition program.

Above, a nurse vaccinating one of the children at the health facility.

- 113 Babies delivered.
- 1048 Malaria cases treated
- 625 Malnutrition cases
- 105 Out reaches carried out
- 1594 Immunizations carried out
- 175 Antenatal cases handled
- 26 Referrals out
- 109 Urinary tract infections handled
- 900 Girls vaccinated against tetanus and cervical cancer.
- 641 Upper respiratory infections handled

Embracing relationships in philanthropy.

Noah's Ark Children's Ministry Uganda has always believed in working collaboratively.

Here, we have had opportunities to share knowledge, skills, and resources which has helped us touch many lives.

As an organization, we have continued to support other Organizations that have the same vision like we do. Strong partnerships have helped us to promote accountability, transparency and learning. Collaboration has helped us to share expertise which has helped us to influence policy and service delivery especially in child care.

We have seen our relationship with the Asian community grow. So many of them have referred friends to us not only to see what we do but as well to give /partner in the big assignment God has given us.

BIYINZIKA POULTRY INTERNATIONAL DONATES TO NOAH'S ARK CHILDREN'S MINISTRY.

Biyinzika Poultry a recognized poultry brand not only has given job opportunities to some of our children, it has as well agreed to expose our children to poultry farming and annually gives a reasonable quantity of food that covers at a monthly food expense on our budget. This time, they brought the food to our premises and had a good time sharing what we do for the Children, Youth and the women of Uganda.

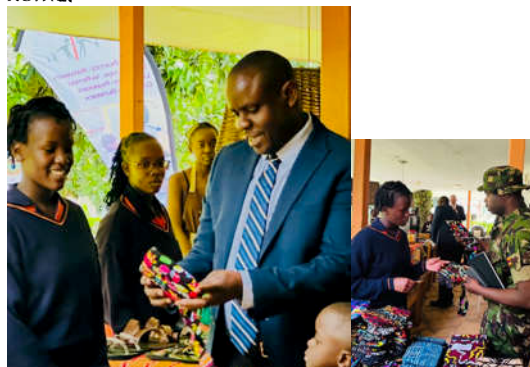

Above, our founder papa hands a certificate of appreciation to the CEO in appreciation for the big food donation from Biyinzika poultry international.

QUOTE; As we work to create light for others, we naturally light our own way.

Above, the founder having a chat with children about sharing what God has given them.

Above, A donation from Ramoth junior school. And right, receiving their certificate of donation.

INSPIRING YOUNG PEOPLE INTO PHILANTHROPY.

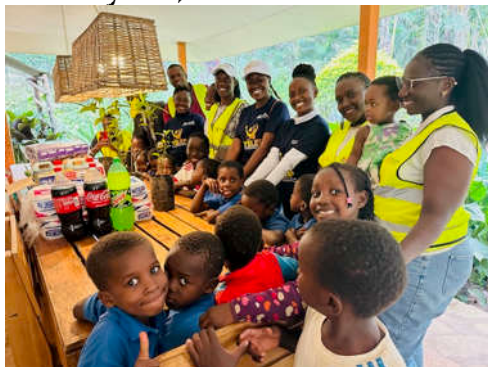

Uganda's greatest strength lies in its young people given the current demographics. Our desire as an organization is to build /shape compassionate young people into philanthropy which helps us to nature the culture of giving, service and responsibility towards others.

This year, we have had many schools under a theme sharing is caring fundraise through their parents /guardians to give a hand to the big assignment God has called us to do. School children have donated food items, sanitary materials, cleaning items, stationery and others have shared a meal with our children which has helped us go an extra mile.

By inspiring young people to serve, we are not only addressing today's needs but also building ethical leaders of tomorrow. *'A generation that gives, cares and uplifts others is what our communities in Uganda need.'*

Above, Seeta parents schools listens to our story ,right, a corticate of donation handed to the teachers by our founder.

Above, University students join the race of giving. right, Montessori school with their donation brought to the children under our care.

QUOTE; Philanthropy is love in action.

Kalagala Community Primary School progress.

2025 is the 4th year of operation for Kalagala Community primary school. This school has played a vital role in the social, academic and emotional development of the children by creating a strong connection between education and community services. Unlike traditional schools that operate in isolation, our school involves coffee farmers and their families, community leaders and the children as stakeholders which has made our education program impactful. This year, we were able to add a sixth class and as well started a four-class room block so that many more children are offered opportunity. The health outreaches have helped our children and community improve on their health. We also had a dental outreach where all children's teeth were checked and given the necessary support by visiting dentists that offer dental services to all the vulnerable children in our programs.

Above, some of the non-school going children that hang around the school.

Above, the school children of Kalagala community school during play time.

Above, the staff body of Kalagala Community school.

Our schools get a new school's coordinator.

Kiyuba John is a renowned educationist with an experience of over 30 years in the Education field. This year, he came on board as a school's coordinator. He plays a vital role of ensuring the smooth and efficient operation of the Noah's Ark Children's Ministry schools (The New Horizon Schools) by managing various administrative, academic and support services. He also acts as a bridge between different departments, staff and stakeholders to ensure effective communication and coordination.

His responsibilities include overseeing student schedules, implementing curriculums, coordinating extracurricular activities and managing the schools' administrative functions.

His position is a strong link between our Education Program and the NACYMU Management team.

When I joined the New Horizon schools, I was very excited to be part of this great Ministry. I have trained the teachers of all sections. We have mastered how to relate with the children.

Am going to emphasize more competence-based learning and as well continue with student projects that will be showcased on our visitation days. I thank the sponsors and donors for the support because as schools, we have never lacked any resources.

Our education program had grown; we needed a person that would monitor consistence in all our schools. Our desire is to offer uniform services that are in alignment with our school slogan, **From nobody to somebody.**

When you visit our Kalagala Community school (Kayunga District), if you are not told where you are, you may think that you are in our Mukono school because of the similarities .

THE FOOD BASKETS

While the festive season is usually a time when many like to receive gifts from their loved ones, to some of our beneficiaries, it's a time of struggle to have a decent Christmas meal.

Necessities like a bar of soap, cooking oil, beans, rice, maize flour, tealeaves, matooke (green bananas) etc. all packaged in a basin and are handed to the beneficiaries of our programs.

For many years, this package has always given lots of joy, hope and as well tangible relief for our beneficiaries.

For a few of our stake holders like Uganda police's family protection unit, local village authority heads, Village Health Team heads, clergy and probation offices. We use the baskets as a way of acknowledging them for being part of the work that we do in the communities.

As well as a sign of accountability during close of year and creating more ambassadors in the communities.

Like the School sponsored children in Mukono, the Kalagala community school children (new Education program), this is their 3rd year of an assured Christmas meal. Families come as early as 7:00am ready to receive their bundle of joy.

Some of our beneficiaries come as far as 10 kilometers on foot to receive their baskets.

Because of you our well - wishers, the high prices of food didn't stop us from sharing the joy that Christmas brings.

We have maintained soya porridge which is a valuable source of protein very essential to the malnourished children.

This program takes 2 weeks of preparation and 1 week of distribution to different beneficiaries.

We were able to remind our Education program beneficiaries of their responsibility i.e., parents ensuring children come to school as well as calling them up for more participation as a way of creating ownership.

As a culture, our children organized a Christmas musical to share the message of Christmas, thereafter; the baskets were handed over to the joyful parents.

The coffee farmers, Jajja's (the elderly), a few government offices we work closely plus our staff were part of the recipients of the Christmas baskets.

As an organization, this package reflects Christ and his limitless love for humanity.

Because of your support, we were able to give out 1,174 Christmas baskets.

May God bless you.

Above, some of the school Sponsored children with their baskets.

Above, a happy mother with her children after receiving their basket.

Above, the beneficiaries waiting for their baskets.

THE NUMBERS OF BASKETS IN 2025

- 150 School sponsorship children Mukono
- 220 School sponsorship children Kalagala
- 20 Elderly
- 178 staff
- 200 coffee famers
- 57 stake holders (clergy, police officers, local council heads, Health heads, mobilizers, security etc.
- 250 Malnutrition program – Mukono
- 100 Malnutrition program – Kayunga

A quote from LC ii Chair person.

"When I was approached to give this NGO a recommendation for permit renewal, I didn't hesitate because the work they do for our communities is visible".

Above, A group picture with mama and papa in the middle, and the Malnutrition beneficiaries after the musical at the Noah's ark family church

Malnutrition program Christmas baskets

Like 2024, we mobilized all malnutrition program beneficiaries for the year 2025 to come for their Christmas baskets. A day starts with screening and health educating all our beneficiaries in this program. Like the other beneficiaries in our programs, a message of hope was given through a Christmas musical organized by the children under our care.

On these 2 days, we had over 350 beneficiaries.

The founder of this program Pita Buitendijk (mama) was given a special recognition.

Majority of the children that had been discharged had progressed really well. The only group that was still struggling were the children with disabilities.

We had patients share testimonies and lessons learnt that had helped their children to recover. We had to limit the numbers of those that wanted to share.

Instead encouraged them to continue referring mothers in the same struggle to us.

Also had practical lessons of preparing soya milk and encouraged them to teach others in the same situation.

The other purpose of calling the Nutrition beneficiaries back is;

- i. A source of encouragement that they are not alone.
- ii. Restoration of hope from the former beneficiaries that have fully recovered.
- iii. Winning more ambassadors / mobilisers to ensure continuity of the program.
- iv. Calling them back also helps us to do early detection. Here, Screening is done to see how they are doing, in case of those that relapse, they are put back in the program.
- v. Treating those that are still on the program.

Health education is provided in form of a reminder to feed the children on time especially with foods rich in proteins.

Fortunately, majority of the children recover well.

Both communities are appreciative of the change in health of their children and kalagala being predominantly a Moslem community, that doesn't stop the community from embracing the service.

This activity was carried out in both Mukono and Kayunga districts.

Because of your support, we were able to give out 350 Christmas baskets to this program.

We feel blessed to share this story with you. Be blessed.

Above, our band playing during the handing out of the Christmas baskets.

The Doctor giving a health talk

Above, the elderly were among the categories that received. 15

Our Challenges

- The high taxes on importation have limited us on the donations we used to receive from our donors out of Uganda. This made us resort to buying home commodities that are of poor quality, limited options and expensive.
- Finding competent people to fulfill what needs to be done.
- Poor harvest as a result of a prolonged drought.
- The impact of Donald Trump's sanctions on USAID and UN affected our Health program being that several of our programs were benefiting from that support.
- Increased theft cases both inside the compound and outside. All caused by the poor economic situation.
- The high fuel prices have increased our transport budget coupling it up with poor roads especially in the communities we serve in make repair costs for the Organization Vehicles high.
- Some times our stakeholders are not as cooperative as expected.
- Despite being in operation for over 25 years, the work is still big especially with the increasing malnutrition cases, youth demographics, health care challenges, this justifies our relevancy to continue serving.

Our prospects

We are still committed to helping to improve the lives of the most needy vulnerable children of Uganda, further through impacting more lives and reaching out to more communities in Mukono and Kayunga districts especially.

- Completion and furnishing of our special needs children's home (light house) as well as offering therapy space for those that need it from the community.
- Starting on the construction of a stored office block which will house most of the offices to ease supervision and minimising time wasted of moving from office to office.
- Further expanding our entrepreneurship strategy through our youth engagement program to explore practical implementation.
- Full utilization of the Ark building which is a symbol of Noah's Ark in the bible that aligns well with our story as an organization.
- The Completion of the Kalagala Health facility and opening. In the same facility, we shall as well extend the malnutrition program.

Above, the health facility-undergoing final touches.

- We hope to put finishing touches on the 4th block of extra classes i.e. primary 6 and 7 at Kalangala primary school.
- Final touches on the extra classrooms block in New Horizon Primary School mukono in order to capture the growing need of children.
- Expand coffee tourism to attract more youth and the NACYM vistors. 16

A message from the CEO's office

As I reflect on how far we have come as an organization, am grateful for the accomplishments and milestones.

This year, marks the beginning of the next 25 years of impacting many lives of children and youth.

As needs continue to rise, over stretching our funding especially in the field of health, we pledge to be the best stewards for the resources entrusted to us.

We will continuously evaluate our resources in order to improve on our efficiency and responsiveness to diverse situations in our programs.

Throughout the 25 years of our journey, NACMU has shown encouraging progress and clear impact in the lives of our beneficiaries.

As a way of increasing resource mobilization, we have managed to develop new partnerships and alliances for example in the field of health, Education and local philanthropists in the industrial sector. Such relations have helped us to serve more vulnerable communities.

I therefore wish to thank all individuals, funding partners local and international for supporting our efforts in the fight for the plead of the vulnerable children and communities in Uganda.

Our thread of connectivity runs long and deep.

Gladys Nalunkuma Senkumba
Office of the CEO
NACMU.

A quote from Papa,

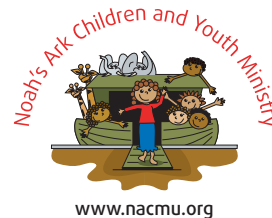

"My encouragement is seeing what mom and me have done because we simply showed that we care."

Sir. Piet Buitendijk

A quote from Papa,

"Childcare is not a job; it's part of life"

Sir. Piet C. Buitendijk

About us

Established 25 years ago, NACYM as a Christian none denomination Organization focuses on holistic childcare and developmental programs, which put children first in all its interventions.

NACYM has worked to provide Education in the four NACYM owned Schools, social welfare, food, accommodation and health needs for thousands of vulnerable children and communities.

NACYM runs a children's home which meets all the alternative care requirements, Health center iii and a Youth engagement program which simultaneously serves a wide community.
