

Christmas baskets 2021

The lifting of the lock down at the end of the year enabled us to continue with our annual program of extending the joy of Christmas to the beneficiaries of our programs. The Sponsored Children and their families anxiously waited in long lines for their turns to receive their baskets.

Un like in the past where our missionaries and volunteers have been in charge of organizing Christmas plays or musicals, this time, the teenage children under our direct care took charge.

Together with the parents of the sponsored children on our education program enjoyed the production.

There after, the day was crowned with a gift basket.

For the ones under the malnutrition program, it was an opportunity for our health workers to check on the former beneficiaries .The children were screened, The parents were health educated and there was sharing of testimonies for those that had benefited from the program as an encouragement to the newly enrolled.

The children that had relapsed, they were put back in the program.

For our beneficiaries in Kayunga District, we used our band to mobilize the communities. They all communed at the newly established kalagala community primary school a Noah's ark children's Ministry project. We got an opportunity to expose the community to our other programs but as well, as a way of creating rapport and good will among the neighboring communities Papa Piet handed the baskets him self to the beneficiaries.

We managed to share the joy that Christmas brings to over 600 families. This included the sponsored children, the elderly, the staff, the farmers from kalagala and mutukula villages and the malnutrition program beneficiaries.
